MULTIPLE DRILL FOR103056

SIX DIAMOND DRILLING HEADS, FOR CEILINGS AND WALLS

Illustrative photo: the machine on its mast trolley, with the control case (sold separately) and a vacuum cleaner (not included).

The **MULTIPLE DRILL** carries six diamond drilling heads: you drill six holes in a single pass.

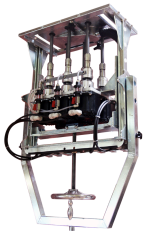

Six brushless motors drive the heads. They are controlled from the control case, which is required and sold separately.

A screw handwheel feeds the six heads together. Supplied on its mast trolley, it drills into ceilings and walls; it can also be installed on an aerial work platform.

SPECIFICATIONS

DIAMOND DRILLING HEADS	**6**
MOTORS	**6 brushless**
CONTROL CASE	**Required, sold separately**
FEED	**Manual, screw handwheel**
HEADS	**Fed together**
DRILLING	**Ceilings and walls**
INSTALLATION	**Mast trolley or platform**
MAST TROLLEY	**Included**
VACUUM CLEANER	**Not included, connection required**

DRILLING HEAD

Drilling head: brushless motors, feed handwheel and screw (illustrative photo)

- **Control case required**, sold separately: it controls the six motors.
- **Machine firmly secured before any drilling**, on its trolley as on a platform: it must not be able to move while drilling.
- **On a platform, respect its rated load:** machine, control case and tools add to the platform load.
- **Always work connected to a vacuum cleaner** (not included) or a dust extraction system, with at least a P2 mask for ordinary dust, P3 as a minimum on asbestos sites. Hearing protection mandatory: six heads run at the same time.
- **24-month manufacturer warranty.**
